INDEPENDENT AUDITOR'S REPORT

Superintendent and School Board
Simpson County School District

I have audited the accompanying financial statements of the governmental activities, each major fund, and the aggregate remaining fund information of the Simpson County School District as of and for the year ended June 30, 2006, which collectively comprise the Simpson County School District's basic financial statements as listed in the table of contents. These financial statements are the responsibility of the Simpson County School District's management. My responsibility is to express opinions on these financial statements based on my audit.

I conducted my audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that I plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and the significant estimates made by management, as well as evaluating the overall financial statement presentation. I believe that my audit provides a reasonable basis for my opinion.

In my opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, each major fund, and the aggregate remaining fund information of the Simpson County School District as of June 30, 2006, and the respective changes in financial position thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

In accordance with *Government Auditing Standards*, I have also issued my report dated February 2, 2007, on my consideration of the Simpson County School District's internal control over financial reporting and on my tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements and other matters. The purpose of that report is to describe the scope of my testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be considered in assessing the results of my audit.

The Management's Discussion and Analysis on pages 7 through 12 and the Budgetary Comparison Schedules and related notes on pages 43 - 45 are not a required part of the basic financial statements but are supplementary information required by accounting principles generally accepted in the United States of America. I have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, I did not audit the information and express no opinion on it.

My audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Simpson County School District's basic financial statements. The accompanying Schedule of Expenditures of Federal Awards is presented for purposes of additional analysis as required by U.S. Office of Management and Budget Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*, and is not a required part of the basic financial statements. In addition, the Schedule of Instructional, Administrative and Other Expenditures – Governmental Funds is presented for purposes of additional analysis as required by the Mississippi State Auditor's Office. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in my opinion, is fairly stated, in all material respects, in relation to the basic financial statements taken as a whole.

SIMPSON COUNTY SCHOOL DISTRICT MANAGEMENT'S DISCUSSION AND ANALYSIS FOR THE YEAR ENDED JUNE 30, 2006

The discussion and analysis of Simpson County School District's financial performance provides an overall narrative review of the School District's financial activities for the year ended June 30, 2006. The intent of this discussion and analysis is to look at the School District's performance as a whole; readers should also review the financial statements and the notes to the basic financial statements to enhance their understanding of the School District's financial performance. Information contained in this section is qualified by the more detailed information contained elsewhere in this district's financial statements, notes to financial statements and any accompanying materials. To the extent this discussion contains any forward-looking statements of the district's plans, objectives, expectations and prospects, the actual results could differ materially from those discussed herein.

Simpson County School District serves an enrollment of 4200 students in grades K – 12. These students are housed in 3 locations on 9 campuses. Breakfast and lunch meals are provided for students in grades K – 8 and lunch meals for students in grades 9 – 12.

Simpson County School District is the largest single employer in the county. The district employs over 500 people on a full-time basis with over 300 of those employees having college degrees.

FINANCIAL HIGHLIGHTS

- Total net assets increased \$1,186,632, which represents 5% increase from fiscal year 2005.
- General revenues account for \$22,858,966 in revenue, or 75% of all revenues. Program specific revenues in the form of charges for services and grants and contributions accounted for \$7,431,324 or 25% of total revenues.
- The District had \$29,703,658 in expenses; only \$7,431,324 of these expenses was offset by program specific charges for services, grants and contributions. General revenues of \$22,858,966 were adequate to provide for these programs.
- Among major funds, the General Fund had \$23,041,968 in revenues and \$21,564,156 in expenditures. The General Fund's fund balance increased \$72,561 over the prior year.
- Capital assets, net of accumulated depreciation, increased by \$2,173,938. This increase is the result of ongoing construction projects and the acquisition of school buses and furniture and equipment.
- Long-term debt decreased by \$498,219.

OVERVIEW OF FINANCIAL STATEMENTS

This discussion and analysis is intended to serve as an introduction to the District's basic financial statements. The District's basic financial statements comprise three components: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the financial statements. This report also contains other supplementary information in addition to the basic financial statements themselves.

Government-wide financial statements. The government-wide financial statements are designed to provide readers with a broad overview of the District's finances, in a manner similar to a private-sector business. These statements are prepared using the accrual basis of accounting and include all assets and liabilities.

The statement of net assets presents information on all the District's assets and liabilities, with the difference between the two reported as net assets. Over time, increases or decreases in net assets may serve as a useful indicator of whether the financial position of the District is improving or deteriorating.

The statement of activities presents information showing how the District's net assets changed during the most recent fiscal year. All changes in net assets are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal years.

The government-wide financial statements outline functions of the District that are principally supported by property taxes and intergovernmental revenues (governmental activities). The governmental activities of the District include instruction, support services, non-instructional, sixteenth section and interest and other expenses on long-term liabilities.

The government-wide financial statements can be found on pages 15 and 16 of this report.

Fund financial statements. A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The District uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. All of the funds of the District can be divided into two categories: governmental funds and fiduciary funds.

Governmental funds. Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on current spendable resources, as well as on balances of spendable resources available at the end of the fiscal year. Such information may be useful in evaluating the District's current financing requirements. Governmental funds are reported using modified accrual accounting. This method of accounting measures cash and other assets that can be easily converted to cash. The governmental funds statements provide a detailed short-term view of the school district's operations.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the District's current financing decisions. Both the governmental fund balance sheet and the governmental fund statement of revenues, expenditures, and changes in fund balances provide a reconciliation to facilitate this comparison between governmental funds and governmental activities. These reconciliations are on pages 18 and 20, respectively, of this report.

The District maintains individual governmental funds in accordance with the *Financial Accounting Manual for Mississippi Public School Districts*. Information is presented separately in the governmental fund balance sheet and in the governmental fund statement of revenues, expenditures, and changes in fund balances for all major funds. All other non-major funds are combined together and presented in these reports as other governmental funds.

The basic governmental fund financial statements can be found on pages 17 and 19 of this report.

Fiduciary funds. Fiduciary funds are used to account for resources held for the benefit of parties outside the District. Fiduciary funds are not reflected in the government-wide financial statements because resources of those funds are not available to support the District's own programs. The accrual basis of accounting is used for fiduciary funds. The school district is responsible for ensuring that the assets reported in these funds are used for their intended purpose. The school district's fiduciary activities are presented in separate Statement of Fiduciary Net Assets on page 21.

Notes to the financial statements. The notes provide additional information that is essential to have a full understanding of the data provided in the government-wide and fund financial statements. The notes to the financial statements can be found on pages 23 - 33 of this report.

Other information. In addition to the basic financial statements and accompanying notes, this report also presents certain required supplementary information concerning the District's budget process.

The District adopts an annual operating budget for all governmental funds. A budgetary comparison statement has been provided for the General Fund and each additional major special revenue fund. This required supplementary information can be found on pages 43 - 45 of this report.

Additionally, a schedule of expenditures of federal awards is required by OMB Cir. A-133 and a schedule of instructional, administrative and other expenditures for governmental funds can be found on pages 37 and 39, respectively, of this report.

GOVERNMENT-WIDE FINANCIAL ANALYSIS

Net assets. Net assets may serve over time as a useful indicator of a government's financial position. In the case of the District, assets exceeded liabilities by \$23,332,382 as of June 30, 2006.

By far the largest portion of the District's net assets (67%) reflects its investment in capital assets (e.g., land, buildings, improvements other than buildings, mobile equipment, furniture and equipment and construction in progress, less any related debt used to acquire those assets that is still outstanding. The District uses these capital assets to provide services to its students; consequently these assets are not available for future spending.

The District's financial position is a product of several financial transactions including the net result of activities, the acquisition and payment of debt, the acquisition and disposal of capital assets and the depreciation of capital assets.

The following table presents a summary of the District's net assets as of June 30, 2006 and 2005, respectively.

	<u>Net Assets</u>		<u>Percentage</u>

The following are significant current year transactions that have had an impact on the Statement of Net Assets.

- The principal retirement of \$460,000 of long-term debt.
- The addition of \$2,954,276 in capital assets from construction projects, school buses and furniture and equipment.

Changes in net assets. The District's total revenues for the fiscal year ended June 20, 2006 were \$30,290,290. The total cost of all programs and services was \$29,703,658. The following table presents a summary of the changes in net assets for the fiscal years ending June 30, 2006 and 2005, respectively.

The following are significant current year transactions that have had an impact on the Statement of Activities.

Special items consisting of insurance loss recoveries were received by the district as a result of damages caused by Hurricane Katrina.

Revenues generated by Charges for Services decreased significantly when the state suspended meal costs for all students for a four month period as a result of Hurricane Katrina.

Property tax revenues increased due to growth in the overall assessed value of the county and a 4% increase in local ad valorem support.

Governmental activities. The following table presents the cost of five major District functional activities: instruction, support services, non-instructional, sixteenth section and interest and other expenses on long-term debt for fiscal years ending June 30, 2006 and 2005, respectively. The table also shows each function's net cost (total cost less charges for services generated by the activities and intergovernmental aid provided for specific programs). The net cost shows the financial burden that was placed on the State and District's taxpayers by each of these functions.

- Net cost of governmental activities (\$22,272,334), was financed by general revenue, which is made up of primarily property taxes (\$4,990,469) and state revenue (\$17,000,236).
- Investment earnings accounted for \$169,239 of funding.

FINANCIAL ANALYSIS OF THE DISTRICT'S FUNDS

As noted earlier, the District uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

Governmental funds. The focus of the District's governmental funds is to provide information on current inflows, outflows and balances of spendable resources. Such information is useful in assessing the District's financing requirements. In particular, unreserved fund balance may serve as a useful measure of the District's net resources available for spending at the end of the fiscal year.

The financial performance of the District as a whole is reflected in its governmental funds. As the District completed the year, its governmental funds reported a combined fund balance of \$7,874,268, a decrease of \$1,502,378 due primarily to constructions projects being financed with local funds. \$5,406,725 or 69% of the fund balance constitutes unreserved and undesignated fund balance, which is available for spending at the District's discretion. The remaining fund balance of \$2,467,543 or 31% is reserved to indicate that it is not available for spending because it has already been committed.

The General Fund is the principal operating fund of the District. The increase in fund balance in the General Fund for the fiscal year was \$72,561. The fund balance of Other Governmental Funds showed a decrease due primarily to constructions projects being financed with local funds.

BUDGETARY HIGHLIGHTS

Over the course of the year, the District revised the annual operating budget.

- Budget amounts for revenue from state sources was increased to reflect revenues received for recovery of damages as a result of Hurricane Katrina.
- Budgeted amounts for expenditures for repairs increased as a result of Hurricane Katrina damages sustained by the district.

A schedule showing the original and final budget amounts compared to the District's actual financial activity for the General Fund and other major special revenue funds is provided in this report as required supplementary information.

CAPITAL ASSETS AND DEBT ADMINISTRATION

Capital Assets. As of June 30, 2006, the District's total capital assets were \$28,497,730, including land, construction in progress, school buildings, improvements other than buildings, buses, other school vehicles and furniture and equipment. This amount represents an increase of \$2,932,964 from the previous year. Total accumulated depreciation as of June 30, 2006 was \$8,930,214 and total depreciation expense for the year was \$768,192, resulting in total net assets of \$19,567,516.

	<u>Capital Assets, Net of Depreciation</u>		Percentage
	<u>2006</u>	<u>2005</u>	<u>Change</u>
Land	\$ 159,514	\$ 43,113	270 %
Construction in progress	2,819,498	2,098,145	34 %

Total	<u>\$ 19,567,516</u>	<u>\$ 17,393,578</u>	13 %

Additional information of the District's capital assets can be found in Note 4 on pages 30 and 31 of this report.

Debt Administration. At June 30, 2006, the District had \$4,039,839 in general obligation bonds and other long-term debt outstanding, of which \$494,484 is due within one year.

	<u>Outstanding Debt</u>		Percentage <u>Change</u>
	<u>2006</u>	<u>2005</u>	
Limited obligation bonds payable	\$ 3,895,000	\$ 4,355,000	(11 %)
Compensated absences payable	144,839	183,058	(20 %)
Total	\$ 4,039,839	\$ 4,538,058	11 %

Additional information of the District's long-term debt can be found in Note 5 on pages 31 and 32 of this report.

CURRENT ISSUES

The Simpson County School District is financially stable. The District is proud of its community support of the public schools.

The District has committed itself to financial excellence for many years. The millage has increased 4.49 mills over the last 7 years. In addition, the District's system of financial planning, budgeting and internal financial controls are well regarded. The District plans to continue its sound fiscal management to meet the challenges of the future.

Latest enrollment figures indicate that student enrollment in the District is holding at approximately 4200. The budget for the next fiscal year has taken enrollment into account in both funding and staffing needs.

Simpson County School District
Notes to Financial Statements
For the Year Ended June 30, 2006

(1) Summary of Significant Accounting Policies.

The accompanying basic financial statements of the school district have been prepared in conformity with generally accepted accounting principles (GAAP) as prescribed by the Governmental Accounting Standards Board (GASB). GASB is the accepted standard setting body for governmental accounting and financial reporting principles. The most significant of the school district's accounting policies are described below.

A. Financial Reporting Entity.

For financial reporting purposes, the reporting entity includes all funds that are covered by the oversight responsibility of the school district's governing board. As defined by accounting principles generally accepted in the United States of America, the school district is considered a "primary government." The school district is governed by a five member board. Each member was elected by the citizens of the school district.

B. Basis of Presentation.

The school district's basic financial statements consist of government-wide statements, including a statement of net assets and a statement of activities and fund financial statements which provide a more detailed level of financial information.

Government-Wide Financial Statements:

The Statement of Net Assets and Statement of Activities display information about the reporting government as a whole. They include all funds of the reporting entity except for fiduciary funds, if applicable. Governmental activities generally are financed through taxes, intergovernmental revenues, and other nonexchange revenues.

The Statement of Net Assets presents the financial condition of the governmental activities of the school district at year-end. The Statement of Activities presents a comparison between direct expenses and program revenues for each function or program of the school district's governmental activities. Direct expenses are those that are specifically associated with a service, program or department and therefore clearly identifiable to a particular function. Program revenues include charges paid by the recipient of the goods or services offered by the program. It also includes grants and contributions that are restricted to meeting the operational or capital requirements of a particular program. Revenues which are not classified as program revenues are presented as general revenues of the school district, with certain limited exceptions. The comparison of direct expenses with program revenues identifies the extent to which each governmental function is self-financing or draws from the general revenues of the school district.

Fund Financial Statements:

Fund financial statements of the reporting entity are organized into funds, each of which is considered to be separate accounting entities. Each fund is accounted for by providing a separate set of self-balancing accounts that constitute its assets, liabilities, fund equity, revenues, and expenditures. Funds are organized into two major categories: governmental and fiduciary. An emphasis is placed on major funds within the governmental category.

C. Measurement Focus and Basis of Accounting.

In the government-wide Statement of Net Assets and Statement of Activities and the Statement of Fiduciary Net Assets, governmental activities are presented using the economic resources measurement focus and the accrual basis of accounting as are the Fiduciary Fund financial statements. Revenues are recognized when earned and expenses are recorded when the liability is incurred or economic asset used regardless of when the related cash flow takes place. Revenues, expenses, gains, losses, assets, and liabilities resulting from exchange and exchange-like transactions are recognized when the exchange takes

Simpson County School District
Notes to Financial Statements
For the Year Ended June 30, 2006

place. Program revenues on the Statement of Activities consist primarily of state appropriations and federal awards.

In the fund financial statements, governmental funds and agency funds are presented using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized when "measurable and available". Measurable means knowing or being able to reasonably estimate the amount. Available means collectible within the current period or within sixty days after year end. Property taxes, state appropriations and federal awards associated with the current fiscal period are all considered to be susceptible to accrual and so have been recognized as revenues of the current fiscal period. Expenditures (including capital outlay) are recorded when the related fund liability is incurred, except for general obligation bond principal and interest which are reported when due.

The school district reports the following major governmental funds:

General Fund - This is the school district's primary operating fund. It accounts for all financial resources of the school district, except those required to be accounted for in another fund.

Sixteen Section Interest Fund - This fund is used to account for the expendable financial resources generated from the use of sixteenth section trust lands.

Sixteenth Section Principal Fund - This fund is used to account for the non-expendable resources from the sale of non-renewable resources on sixteenth section lands.

All other governmental funds not meeting the criteria established for major funds are presented in the other governmental column of Exhibit C.

Additionally the school district reports the following fund types:

GOVERNMENTAL FUNDS

Special Revenue Funds - Special Revenue Funds are used to account for the proceeds of specific revenue sources (other than major capital projects) that are legally restricted for specific expenditure purposes.

Capital Projects Funds - Capital Projects Funds are used to account for financial resources to be used for the acquisition or construction of major capital facilities.

Debt Service Funds - Debt Service Funds are used to account for the accumulation of resources for, and the payment of, general long-term debt principal, interest and related costs.

Permanent Funds - Permanent Funds are used to account for resources that are legally restricted to the extent that only earnings, and not the principal, may be used for purposes that support the district's programs.

FIDUCIARY FUNDS

Agency Funds - Agency Funds are used to report resources held by the district in a purely custodial capacity (assets equal liabilities) and do not involve measurement of results of operations.

D. Account Classifications.

The account classifications used in the financial statements conform to the broad classifications recommended in *Governmental Accounting, Auditing and Financial Reporting* as issued in 2005 by the Government Finance Officers Association and are consistent with the broad classifications recommended in the *Financial Accounting for Local and State School Systems, 1990* issued by the U.S. Department of Education.

Simpson County School District
Notes to Financial Statements
For the Year Ended June 30, 2006

E. Encumbrances.

An encumbrance system is not maintained to account for commitments resulting from approved purchase orders, work orders and contracts.

F. Cash and Cash Equivalents.

The school district deposits excess funds in the financial institutions selected by the school board. State statutes specify how these depositories are to be selected.

Cash and cash equivalents consist of amounts on deposit in demand accounts and certificates of deposit with maturities of 12 months or less. Cash and cash equivalents are valued at cost.

G. Investments.

The school district can invest its excess funds, as permitted by Section 29-3-113, Miss. Code Ann. (1972), in interest-bearing deposits or other obligations of the types described in Section 27-105-33, Miss. Code Ann. (1972), or in any other type investment in which any other agency, instrumentality or subdivision of the state of Mississippi may invest, except that 100% of said funds are authorized to be so invested.

For accounting purposes, certificates of deposit are classified as investments if they have a maturity greater than 12 months when acquired.

Investments are reported at fair value.

H. Inventories and Prepaid Items.

Donated commodities are received from the USDA and are valued at USDA cost. Other inventories are valued at cost (calculated on the first-in, first-out basis).

The costs of governmental fund type inventories are reported as expenditures when purchased.

Prepaid items, such as prepaid insurance, are not reported for governmental fund types since the costs of such items are accounted for as expenditures in the period of acquisition.

I. Capital Assets.

Capital asset acquisition and construction are reflected as expenditures in the governmental fund statements and the related assets are reported as capital assets in the governmental activities column in the government-wide financial statements.

Capital assets are reported at actual or estimated historical cost based on appraisals or deflated current replacement cost. Contributed assets are reported at estimated fair value at the time received.

Capitalization thresholds (dollar value above which asset acquisitions are added to the capital asset accounts) and estimated useful lives of capital assets are reported in the government-wide statements. Depreciation is calculated on the straight-line basis for all assets, except land. The following schedule details those thresholds.

	Capitalization Policy	Estimated Useful Life
Land	\$ 0	0
Buildings	\$ 50,000	40 years
Building improvements	\$ 25,000	20 years
Improvements other than buildings	\$ 25,000	20 years

Simpson County School District
Notes to Financial Statements
For the Year Ended June 30, 2006

Mobile equipment	\$	5,000	5-10 years
Furniture and equipment	\$	5,000	3-7 years
Leased property under capital leases		*	*

(*) The threshold amount will correspond with the amounts for the asset classifications, as listed. See Note 4 for details.

J. Long-term liabilities.

Long-term liabilities are the unmatured principal of bonds, warrants, notes, or other forms of noncurrent or long-term general obligation indebtedness. Long-term liabilities are not limited to liabilities from debt issuances, but may also include liabilities on lease-purchase agreements and other commitments. In the government-wide Statement of Net Assets, long-term debt and other long-term obligations are reported as liabilities in the governmental activities column. (See Note 5 for details).

K. Interfund Transactions and Balances.

Interfund transactions and balances are the result of timing differences between the date expenses/expenditures occur and the date payments are made.

Short-term (due within one year) interfund loan receivables are reported as "due from other funds" and are considered available expendable resources. Noncurrent portions of long-term interfund loan receivables are reported as advances and are offset equally by a fund balance reserve account which indicates that they do not constitute expendable available financial resources and, therefore, are not available for appropriation.

Transfers are used to (a) move revenues from the fund that statute or budget requires to collect to the fund that statute or budget requires to expend them and to (b) use unrestricted revenues collected in the general fund to finance various programs accounted for in other funds in accordance with budgetary authorizations.

Interfund receivables and payables between funds within governmental activities are eliminated in the Statement of Net Assets. See Note 3 for details for interfund transactions, including receivables and payables at year-end.

L. Equity Classifications.

Government-Wide Financial Statements:

Equity is classified as net assets and displayed in three components:

- a. Invested in capital assets, net of related debt - Consists of capital assets including restricted capital assets, net of accumulated depreciation and reduced by the outstanding balances of any bonds, mortgages, notes, or other borrowings that are attributable to the acquisition, constructions, or improvement of those assets.
- b. Restricted net assets - Consists of net assets with constraints placed on the use either by (1) external groups such as creditors, grantors, contributors, or laws or regulations of other governments; or (2) law through constitutional provisions or enabling legislation.
- c. Unrestricted net assets - All other net assets that do not meet the definition of "restricted" or "invested in capital assets, net of related debt."

Fund Financial Statements:

Governmental fund equity is classified as fund balance. Fund balance is further classified as reserved and

Simpson County School District
Notes to Financial Statements
For the Year Ended June 30, 2006

unreserved, with unreserved further split between designated and undesignated.

Fund reserves are portions of fund equity that are legally segregated for a specific future use or are not available for current operations. Following is a description of fund reserves used by the district:

Reserved for debt service purposes - An account that represents a portion of the fund balance that is legally restricted for the retirement of school district debt.

Reserved for permanent fund purposes - An account that represents a portion of the fund balances that is legally restricted for investment purposes or borrowing by the school board for capital expenditures.

Reserved for unemployment benefits - An account that represents a portion of the fund balance that is legally restricted for the payment of unemployment benefits.

Reserved for forestry improvements - An account that represents a portion of the fund balance that is legally restricted for improving sixteenth section forest lands.

Reserved for advances - An account used to offset advances recorded in the asset accounts since they do not constitute available spendable resources and are not a component of net current assets.

Reserved for inventory - An account that represents a portion of the fund balance which indicates that inventories do not represent available spendable resources even though they are a component of net current assets.

M. Property Taxes.

Ad valorem property taxes are levied by the governing authority of the county on behalf of the school district based upon an order adopted by the school board of the school district requesting an ad valorem tax effort in dollars. Since the taxes are not levied and collected by the school district, the revenues to be generated by the annual levies are not recognized until the taxes are actually collected by the tax levying authority.

N. Mississippi Adequate Education Program Revenues.

Revenues from the adequate education program are appropriated on a fiscal year basis and are recorded at the time the revenues are received from the state of Mississippi.

O. Compensated Absences.

Employees of the school district accumulate sick leave at a minimum amount as required by state law or at a greater amount provided by school district policy. Some employees are allowed personal leave and/or vacation leave in accordance with school district policy. The district pays for unused leave for employees as required by Section 37-7-307(5), Miss. Code Ann. (1972).

The liability for these compensated absences is recorded as long-term liabilities in the government-wide statements. The current portion of this liability is estimated based on historical trends. In the fund financial statements, governmental funds report the compensated absence liability payable from expendable available financial resources only if the payable has matured, for example, an employee retires.

(2) Cash and Cash Equivalents and Investments

The district follows the practice of aggregating the cash assets of various funds to maximize cash management efficiency and returns. Various restrictions on deposits and investments are imposed by statutes. These restrictions are summarized below:

Simpson County School District
Notes to Financial Statements
For the Year Ended June 30, 2006

Deposits. The school board must advertise and accept bids for depositories no less than once every three years as required by Section 37-7-333, Miss. Code Ann. (1972). The collateral pledged for school district deposits in financial institutions are held in the name of the Mississippi State Treasurer under a program established by the Mississippi State Legislature and is governed by Section 27-105-5, Miss. Code Ann. (1972). Under this program, the school district's funds are protected through a collateral pool administered by the State Treasurer. Financial institutions holding deposits of public funds must pledge securities as collateral against those deposits. In the event of failure of a financial institution, securities pledged by that institution would be liquidated by the State Treasurer to replace the public deposits not covered by the Federal Depository Insurance Corporation.

Investments. Section 29-3-113 and 37-59-43, Miss. Code Ann. (1972), authorizes the school board to invest surplus funds in the types of investments authorized by Section 27-105-33 (d) and (e), Miss. Code Ann. (1972) and investments authorized under Section 27-105-365 Miss. Code Ann. (1972). That authority permits the following types of investments: (a) certificates of deposit and interest bearing accounts; (b) direct US Treasury obligations; (c) US Government agencies, US Government instrumentalities or US Government sponsored enterprise obligations; (d) direct security repurchase agreements and reverse direct security repurchase agreements of any federal book entry of those securities enumerated in (b) and (c) above; (e) direct obligations of the US in open-end or closed-end of any management type investment company; (f) in a trust consisting of pooled or commingled funds that includes investments in commercial paper and bankers acceptances or other short-term obligations issued by banks having one (1) of the two (2) highest short-term rating categories of either Standard Poor's Corporation or Moody's Investors Service, or corporate notes and bonds having one (1) of the three (3) highest long-term rating categories of either Standard Poor's Corporation or Moody's Investors Service, or in any open-ended or closed-ended management-type investment company or investment trust registered under the provisions of 15 USCS Section 80(a)-1 et seq. Investment income on bond funds (Capital Projects), bond sinking funds (Debt Service Funds) and sixteenth section principal funds (Permanent Funds) must be credited to those funds. Investment income of \$100 or more of any fund must be credited to that fund. Amounts less than \$100 can be credited to the General Fund.

Cash and Cash Equivalents.

The carrying amount of the school district's deposits with financial institutions reported in the governmental funds and fiduciary funds was \$8,210,663 and \$127,414, respectively. The carrying amount of deposits reported in the government-wide financial statements was: Cash and Cash Equivalents - \$6,847,865 and Restricted Assets - \$1,362,798. The Restricted Assets represents the cash balance of the sixteenth section principal fund (Permanent Fund) which is legally restricted and may not be used for purposes that support the district's programs. The bank balance was \$10,232,467.

Custodial Credit Risk – Deposits. Custodial risk is the risk that in the event of a depository failure, the school district deposits may not be returned to it. The school district does not have a formal policy for custodial credit risk. However, state law permits the Mississippi State Treasurer's office to manage that risk on behalf of the school district. Deposits above FDIC coverage are collateralized by the pledging financial institution's trust department or agent in the name of the Mississippi State Treasurer on behalf of the district. By signed agreement the Mississippi State Treasurer's office is acting on behalf of the school district.

Investments.

The school district had the following investments at year end:

<u>Investment</u>	<u>Credit Rating</u>	<u>Maturities</u>	<u>Fair Value</u>
Money Market Fund (US Treasury Notes/Bills)	AAAm	Various	\$ <u>324,338</u>

Investments are reported at fair value which is based on quoted market price. Nonparticipating investment contracts such as nonnegotiable certificates of deposit are reported at cost.

Interest Rate Risk. The school district does not have a formal investment policy that limits investments maturities as a means of managing its exposure to fair value losses arising from increasing interest rates.

B. Compensated absences payable.

As more fully explained in Note 1(O), compensated absences payable is adjusted on an annual basis as required by Section 37-7-307(5), Miss. Code Ann. (1972). Compensated absences will be paid from the fund from which the employees' salary was paid.

(6) Defined Benefit Pension Plan.

Plan Description. The school district contributes to the Public Employees' Retirement System of Mississippi (PERS), a cost-sharing multiple-employer defined benefit pension plan. PERS provides retirement and disability benefits, annual cost-of-living adjustments, and death benefits to plan members and beneficiaries. Benefit provisions are established by state law and may be amended only by the State of Mississippi Legislature. PERS issues a publicly available financial report that includes financial statements and required supplementary information. That report may be obtained by writing to Public Employees' Retirement System of Mississippi, PERS Building, 429 Mississippi Street, Jackson, MS 39201 or by calling (601) 359-3589 or 1-800-444-PERS.

Funding Policy. PERS members are required to contribute 7.25% of their annual covered salary, and the school district is required to contribute at an actuarially determined rate. The current rate is 10.75% of annual covered payroll. The contribution requirements of PERS members and employers are established and may be amended only by the State of Mississippi Legislature. The school district's contributions to PERS for the fiscal years ending June 30, 2006, 2005 and 2004 were \$1,505,918, \$1,506,697 and \$1,472,615, respectively, which equaled the required contributions for each year.

(7) Sixteenth Section Lands.

Sixteenth section school lands, or lands granted in lieu thereof, constitute property held in trust for the benefit of the public schools. The school board, under the general supervision of the Office of the Secretary of State, has control and jurisdiction of said school trust lands and of all funds arising from any disposition thereof. It is the duty of the school board to manage the school trust lands and all funds arising therefrom as trust property. Accordingly, the board shall assure that adequate compensation is received for all uses of the trust lands, except for uses by the public schools. The following are the future rental payments to be made to the school district for the use of school trust lands. These future rental payments are from existing leases and do not anticipate renewals or new leases.

Thereafter	\$ 53,994
Total	<u>\$ 470,951</u>

(8) Risk Management.

The school district is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; injuries to employees; and natural disasters. Except as described below, the district carries

Simpson County School District

commercial insurance for these risks. Settled claims resulting from these insured risks have not exceeded commercial insurance coverage in any of the past three fiscal years.

Participation in Public Entity Risk Pool.

The school district is a member of the Mississippi Municipal Workers' Compensation Group (MMWCG). The group is a risk-sharing pool; such a pool is frequently referred to as a self-insurance pool. MMWCG covers risks of loss arising from injuries to the school district's employees. The Mississippi Workers' Compensation Commission requires that an indemnity agreement be executed by each member in a workers' compensation self-insurance pool for the purpose of jointly and severally binding the pool and each of the employers comprising the group to meet the workers' compensation obligations of each member. Each member of the MMWCG contributes quarterly to a fund held in trust. The funds in the trust account are used to pay any claim up to \$500,000. For a claim exceeding \$500,000 MMWCG has insurance which will pay the excess up to the statutory limit. If total claims during a year were to deplete the trust account, then the pool members would be required to pay for the deficiencies. The district has not had an additional assessment for excess losses incurred by the pool.

(9) Prior Period Adjustments.

(1) **Basis of Presentation.**

The Budgetary Comparison Schedules presents the original legally adopted budget, the final legally adopted budget, the actual data on the GAAP basis, variances between the original budget and the final budget and variances between the final budget and the actual data.

(2) **Budget Amendments and Revisions.**

The budget is adopted by the school board and filed with the taxing authority. Amendments can be made on the approval of the school board. By statute, final budget revisions must be approved on or before October 15 following the end of the fiscal year. A budgetary comparison is presented for the general fund and each major special revenue fund on the same basis of accounting as the budget which is consistent with accounting principles generally accepted in the United States.

REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON
COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF
FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE
WITH *GOVERNMENT AUDITING STANDARDS*

Superintendent and School Board
Simpson County School District

I have audited the financial statements of the governmental activities, each major fund, and the aggregate remaining fund information of the Simpson County School District as of and for the year ended June 30, 2006, which collectively comprise the district's basic financial statements and have issued my report thereon dated February 2, 2007. I conducted my audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Internal Control Over Financial Reporting

In planning and performing my audit, I considered the school district's internal control over financial reporting in order to determine my auditing procedures for the purpose of expressing my opinion on the basic financial statements and not to provide an opinion on the internal control over financial reporting. My consideration of the internal control over financial reporting would not necessarily disclose all matters in the internal control that might be material weaknesses. A material weakness is a reportable condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that misstatements caused by error or fraud in amounts that would be material in relation to the financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. I did not note any matters involving internal control over financial reporting and its operation that I consider to be material weaknesses

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the school district's financial statements are free of material misstatement, I performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of my audit, and accordingly, I do not express such an opinion. The results of my tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

This report is intended solely for the information and use of the district's school board and management, entities with accreditation oversight, and federal awarding agencies and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

REPORT ON COMPLIANCE WITH REQUIREMENTS APPLICABLE TO EACH MAJOR FEDERAL PROGRAM AND ON INTERNAL CONTROL OVER COMPLIANCE IN ACCORDANCE WITH OMB CIRCULAR A-133

Superintendent and School Board
Simpson County School District

Compliance

I have audited the compliance of the Simpson County School District with the types of compliance requirements described in the *U.S. Office of Management and Budget (OMB) Circular A-133 Compliance Supplement* that are applicable to each of its major federal programs for the year ended June 30, 2006. The district's major federal programs are identified in the summary of auditor's results section of the accompanying Schedule of Findings and Questioned Costs. Compliance with the requirements of laws, regulations, contracts, and grants applicable to each of its major federal programs is the responsibility of the school district's management. My responsibility is to express an opinion on the school district's compliance based on my audit.

I conducted my audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. Those standards and OMB Circular A-133 require that I plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about the school district's compliance with those requirements and performing such other procedures as I considered necessary in the circumstances. I believe that my audit provides a reasonable basis for my opinion. My audit does not provide a legal determination on the school district's compliance with those requirements.

As described in finding 2006-01 in the accompanying Schedule of Findings and Questioned Costs, the Simpson County School District, did not comply with requirements regarding reporting that are applicable to its Hurricane Education Recovery Act Program. Compliance with such requirements is necessary, in my opinion, for the Simpson County School District to comply with requirements applicable to that program.

In my opinion, except for the noncompliance described in the preceding paragraph, the Simpson County School District complied, in all material respects, with the requirements referred to above that are applicable to each of its major federal programs for the year ended June 30, 2006.

Internal Control Over Compliance

The management of the Simpson County School District is responsible for establishing and maintaining effective internal control over compliance with the requirements of laws, regulations, contracts and grants applicable to federal programs. In planning and performing my audit, I considered the school district's internal control over compliance with requirements that could have a direct and material effect on a major federal program in order to determine my auditing procedures for the purpose of expressing my opinion on compliance and to test and report on internal control over compliance in accordance with OMB Circular A-133.

My consideration of the internal control over compliance would not necessarily disclose all matters in the internal control that might be material weaknesses. A material weakness is a reportable condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that noncompliance with applicable requirements of laws, regulations, contracts, and grants caused by error or fraud that would be material in relation to a major

federal program being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. I noted no matters involving internal control over compliance and its operation that I consider to be material weaknesses.

This report is intended solely for the information and use of the district's school board and management, entities with accreditation overview, and federal awarding agencies and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

REPORT ON COMPLIANCE WITH STATE LAWS AND REGULATIONS

Superintendent and School Board
Simpson County School District

I have audited the financial statements of the governmental activities, each major fund, and the aggregate remaining fund information of the Simpson County School District as of and for the year ended June 30, 2006, which collectively comprise Simpson County School District's basic financial statements and have issued my report thereon dated February 2, 2007. I conducted my audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Section 37-9-18(3), Miss. Code Ann. (1972), states in part, "the Auditor shall test to insure that the school district is complying with the requirements of Section 37-61-33(3)(a)(iii), Miss. Code Ann. (1972), relating to classroom supply funds." As required by the state legal compliance audit program prescribed by the Office of the State Auditor, I have also performed procedures to test compliance with certain other state laws and regulations. However, providing an opinion on compliance with state laws and regulations was not an objective of my audit and, accordingly, I do not express such an opinion.

The results of my procedures performed to test compliance with the requirements of Section 37-61-33(3)(a)(iii), Miss. Code Ann. (1972), disclosed no instances of noncompliance. The district reported \$24,423 of classroom supply funds carried over from previous years.

The results of procedures performed to test compliance with certain other state laws and regulations and my audit of the basic financial statements did not disclose any instances of noncompliance with state laws and regulations.

This report is intended solely for the information and use of the school board and management, entities with accreditation overview, and federal awarding agencies and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

Section 2: Financial Statement Findings

The results of my tests did not disclose any findings and questioned costs related to the financial statements that are required to be reported by *Government Auditing Standards*.

Section 3: Federal Award Findings and Questioned Costs

2006-01

Program: Hurricane Education Recovery; CFDA# 84.938; US Department of Education;
 Passed through the Mississippi Department of Education

Compliance Requirement: Reporting

Simpson County School District
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2006

Questioned Cost: \$17,566

Finding:

The district used the incorrect count date when reporting the first quarter claim. By regulation, the Mississippi Department of Education established October 11, 2005 as the count date for the first quarter. The district used October 1, 2005 as the count date. The effect of using the incorrect count date resulted in \$17,566 in questioned cost to the program. Since the questioned cost exceeds the materiality limits for the program, the auditor opinion on compliance is qualified for the reporting compliance requirement. The questioned cost is based on the determinations previously made by the Mississippi Department of Education as part of their program monitoring efforts. This was an isolated instance and the remaining count dates and corresponding reported amounts are unaffected.

Recommendation:

Since this is a one time program, there are no recommendations for correcting the deficiency.
